Allstate Announces April Catastrophe Loss Estimate

NORTHBROOK, Ill., May 16, 2013 – The Allstate Corporation (NYSE: ALL) today announced estimated catastrophe losses for the month of April 2013 of \$216 million, pre-tax (\$140 million after-tax). Catastrophe losses occurring in April comprised seven events at an estimated cost of \$242 million, pre-tax, partially offset by favorable reserve reestimates of prior reported catastrophe losses. Two severe weather events accounted for over 75% of the estimated loss for April events.

The Allstate Corporation (NYSE: ALL) is the nation's largest publicly held personal lines insurer, serving approximately 16 million households through its Allstate, Encompass, Esurance and Answer Financial brand names and Allstate Financial business segment. Allstate branded insurance products (auto, home, life and retirement) and services are offered through Allstate agencies, independent agencies, and Allstate exclusive financial representatives, as well as via www.allstate.com, www.allstate.com/financial and 1-800 Allstate®, and are widely known through the slogan "You're In Good Hands With Allstate®".

Forward-Looking Statements and Risk Factors

This news release contains forward-looking statements about catastrophe losses. These statements are based on our estimates and assumptions that are subject to uncertainty. These statements are made subject to the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995. Management believes the estimated impact of catastrophe losses, including net loss reserves, are appropriately established and recorded based on available facts, information, laws and regulations. However, actual results may differ materially from those projected in the forward-looking statements in this news release and from the amounts currently recorded for a variety of reasons, including the following:

- Our policyholders' ability to report and our ability to adjust claims have been impeded by the extent of the devastation and the number of areas affected.
- It is particularly difficult to assess the extent of damage in the initial stages of adjusting residential property losses.
- Our estimate for the ultimate costs of repairs may not prove to be correct because of increased demand for services and supplies in the areas affected by the catastrophes.
- The number of incurred but not reported (IBNR) claims may be greater or less than currently anticipated.

We assume no obligation to update any forward-looking statements as a result of new information or future events or developments.
