Allstate Accelerates Auto Insurance Rate Increases

Slowing Policy Growth and Reducing Costs to Improve Profitability

NORTHBROOK, Ill., August 3, 2022 – The Allstate Corporation (NYSE: ALL) today reported financial results for the second quarter of 2022.

The Allstate Corporation Consolidated Highlights						
	Three months ended June 30,			Six months ended June 30,		
($ in millions, except per share data and ratios)	2022	2021	% / pts Change	2022	2021	% / pts Change
Consolidated revenues	$ 12,220	$ 12,646	(3.4)%	$24,557	$25,097	(2.2)%
Net income (loss) applicable to common shareholders	(1,042)	1,595	NM	(412)	187	NM

Total policies in force (in thousands)				187,680	189,361	(0.9)

[(1)] In periods where a net loss or adjusted net loss is reported, weighted average shares for basic earnings per share is used for calculating diluted earnings per share because all dilutive potential common shares are anti-dilutive and are therefore excluded from the calculation.

* Measures used in this release that are not based on accounting principles generally accepted in the United States of America ("non-GAAP") are denoted with an asterisk and defined and reconciled to the most directly comparable GAAP measure in the "Definitions of Non-GAAP Measures" section of this document.

NM = not meaningful

"Allstate has a long history of successfully navigating challenging environments, and we are confident in our ability to restore profitability to target levels while continuing to innovate and transform our company," said Tom Wilson, Chair, President and CEO of The Allstate Corporation. "The impact of rising claim repair costs and upward prior year loss reserve development led to a recorded combined ratio of 107.9 in the second quarter. The underwriting loss combined with equity valuation declines and losses on fixed income sales resulted in a net loss of $1.04 billion and an adjusted net loss* of $209 million in the quarter. As a result, we are further accelerating insurance price increases, implementing underwriting restrictions in underperforming states and reducing advertising spend, which is expected to improve profitability and slow policy growth. Insurance premiums earned of $10.9 billion increased 8.6% primarily due to higher average premiums in auto and homeowners insurance. While the current operating environment necessitates focus on improving insurance margins, progress was made on the Transformative Growth strategy including launching beta versions of a new auto insurance product and technology ecosystem. Shareholders also benefited from strong capital management with cash returns of $919 million through common shareholder dividends and share repurchases," concluded Wilson.

Second Quarter 2022 Results

- Total revenues of $12.2 billion in the second quarter of 2022 decreased 3.4% compared to the prior year quarter as an 8.6% increase in Property-Liability earned premium was more than offset by net losses on investments and derivatives in 2022 compared to net gains in 2021 and lower net investment income.

- Net loss applicable to common shareholders was $1.04 billion in the second quarter of 2022 compared to income of $1.60 billion in the prior year quarter, primarily due to lower underlying underwriting income, higher catastrophe losses, equity valuation declines and losses on fixed income sales.

- Adjusted net loss* of $209 million, or $(0.76) per diluted share, compares to adjusted net income* of $1.15 billion generated in the prior year quarter. The decline reflects increased claims severity and unfavorable prior year reserve reestimates, lower net investment income and higher catastrophe losses.

Property-Liability Results						
	Three months ended June 30,			Six months ended June 30,		
($ in millions, except ratios)	2022	2021	% / pts Change	2022	2021	% / pts Change

Allstate Brand	(825)	414	NM	(574)	1,929	NM
National General	(38)	15	NM	(9)	153	NM
Recorded combined ratio	**107.9**	**95.7**	**12.2**	**102.7**	**89.5**	**13.2**
Allstate Protection auto	107.9	94.3	13.6	105.0	87.4	17.6
Allstate Protection homeowners	106.9	100.3	6.6	95.8	94.6	1.2
Underlying combined ratio*	**93.4**	**85.7**	**7.7**	**92.2**	**81.4**	**10.8**
Allstate Protection auto	102.1	91.8	10.3	100.5	86.0	14.5
Allstate Protection homeowners	70.3	69.5	0.8	69.7	68.6	1.1

- **Property-Liability** earned premium of $10.9 billion increased 8.6% in the second quarter of 2022 compared to the prior year quarter, driven primarily by higher average premiums and policies in force growth. The recorded combined ratio of 107.9 generated an underwriting loss of $864 million compared to income of $429 million in the second quarter of 2021.

    - The underwriting loss was primarily driven by adverse prior year reserve reestimates, higher current report year claim severities and increased catastrophe losses. This was partially offset by higher premiums earned.

    - Non-catastrophe prior year reserve strengthening of $411 million in the second quarter of 2022 included $275 million related to personal auto insurance and $91 million related to commercial auto insurance, largely from shared economy business written in states which Allstate has exited.

    - The underlying combined ratio* of 93.4 in the second quarter of 2022 was 7.7 points above the prior year quarter, reflecting a higher auto insurance loss ratio.

    - The expense ratio of 23.0 in the second quarter decreased 1.7 points compared to the second quarter of 2021, mainly from lower advertising expenses and reduced amortization of deferred acquisition costs.

◦ **Allstate Protection auto** insurance earned premium increased 6.8% driven by higher average premiums from rate increases and policies in force growth of 2.3% compared to the prior year quarter. Policies in force growth was driven by National General, including impacts from the SafeAuto acquisition, and the Allstate brand. Allstate brand auto net written premium growth of 7.1% compared to the prior year quarter reflected a 7.3% increase in average gross written premium and 0.3% increase in policies in force. Allstate brand implemented auto rate increases in 30 locations in the second quarter at an average of 8.7%, or 2.5% on total premiums, bringing the year to date impact to 6.1% on total premiums.

The recorded auto insurance combined ratio of 107.9 in the second quarter of 2022 was 13.6 points above the prior year quarter due to higher claim severity and accident frequency compared to the second quarter of 2021 and 3.8 points of unfavorable non-catastrophe prior year reserve reestimates driven by physical damage and bodily injury coverages. The underlying combined ratio* of 102.1 was 10.3 points above the prior year quarter.

Rising auto claim severity levels compared to the prior year reflect higher costs for used cars, parts and labor and are geographically widespread across the United States. Injury claim cost increases reflect more severe auto accidents, increased medical inflation, higher consumption of medical treatment and more claims with attorney involvement.

◦ **Allstate Protection homeowners** insurance earned premium grew 11.4%, and policies in force increased 1.2% compared to the second quarter of 2021. Allstate brand net written premium increased 15.2% compared to the prior year quarter, driven by average premium increases of 13.2% due to inflation in insured home valuations and implemented rate increases, combined with policies in force growth of 1.7%.

The recorded homeowners insurance combined ratio of 106.9 increased 6.6 points compared to the second quarter of 2021 and generated an underwriting loss of $186 million in the quarter. The increase reflects higher catastrophe and non-catastrophe losses and unfavorable prior year reserve reestimates. The underlying combined ratio* of 70.3 increased 0.8 points compared to the second quarter of 2021, driven by higher severity due to inflation in labor and materials costs, partially offset by higher average earned premium.

Protection Services Results

Arity	(1)	1	(2)	(2)	3	(5)
Allstate Identity Protection	(1)	1	(2)	(1)	(9)	8

[1] Excludes net gains and losses on investments and derivatives

- **Protection Services** revenues increased to $629 million in the second quarter of 2022, 8.3% higher than the prior year quarter, primarily due to Allstate Protection Plans, partially offset by declines at Arity. Adjusted net income of $43 million decreased by $13 million compared to the prior year quarter.

◦ **Allstate Protection Plans** revenue of $338 million increased $43 million, or 14.6%, compared to the prior year quarter, reflecting higher earned premium. Adjusted net income of $36 million in the second quarter of 2022 was $6 million lower than the prior year quarter, due to investments in growth.

◦ **Allstate Dealer Services** revenue of $139 million was 6.9% higher than the second quarter of 2021. Adjusted net income of $8 million in the second quarter was $2 million lower than the prior year quarter.

◦ **Allstate Roadside** revenue of $64 million in the second quarter of 2022 increased 6.7% compared to the prior year quarter, driven by increased rescue volumes and new business. Adjusted net income declined by $1 million compared to the prior year quarter.

◦ **Arity** revenue of $52 million decreased $12 million compared to the prior year quarter, due to reductions in client advertising. Adjusted net loss of $1 million in the second quarter of 2022 was $2 million worse than the prior year quarter. Arity continues to expand its data acquisition platform with over 870 billion miles of traffic data being used to serve an increasing number of insurance and third-party application customers.

◦ **Allstate Identity Protection** revenue of $36 million in the second quarter of 2022 increased 12.5% compared to the prior year quarter, due to new client launches and increased participation rates at existing clients. Adjusted net loss of $1 million compared to income of $1 million in the second quarter of 2021.

Allstate Health and Benefits Results

	Three months ended June 30,			Six months ended June 30,		
($ in millions)	2022	2021	% Change	2022	2021	% Change
Premiums and contract charges	$ 466	$ 447	4.3 %	$ 935	$ 902	3.7 %
Employer voluntary benefits	257	255	0.8	523	518	1.0
Group health	95	87	9.2	189	170	11.2
Individual health	114	105	8.6	223	214	4.2
Adjusted net income	65	62	4.8	118	127	(7.1)

- **Allstate Health and Benefits** premiums and contract charges increased 4.3% compared to the prior year quarter, due to growth in individual and group health. Adjusted net income of $65 million in the second quarter of 2022 increased $3 million compared to the second quarter of 2021 as increased premiums and contract charges were only partially offset by higher individual health claims.

Allstate Investment Results

	Three months ended June 30,			Six months ended June 30,		
($ in millions, except ratios)	2022	2021	$ / pts Change	2022	2021	$ / pts Change
Net investment income	**$ 562**	**$ 974**	**$ (412)**	**$ 1,156**	**$ 1,682**	**$ (526)**
Market-based investment income [1]	368	355	13	691	709	(18)

Total return on investment portfolio (trailing twelve months)				**(3.5)%**	**6.8 %**	**(10.3)**

[1] Investment expenses are not allocated between market-based and performance-based portfolios with the exception of investee level expenses.

- **Allstate Investments** $61.1 billion portfolio generated net investment income of $562 million in the second quarter of 2022, a decrease of $412 million from the prior year quarter, driven by lower performance-based income.

- **Market-based investment income** was $368 million in the second quarter of 2022, an increase of $13 million, or 3.7%, compared to the prior year quarter reflecting an increase in the fixed income portfolio yield, which has benefited from reinvesting at higher interest rates.
- **Performance-based investment income** totaled $236 million in the second quarter of 2022, a decrease of $413 million compared to an exceptional prior year quarter. Second quarter 2022 results benefited from portfolio diversification as contributions from real estate and other asset classes, including infrastructure investments, contributed more to income than private equity investments.
- **Net losses on investments and derivatives** were $733 million in the second quarter of 2022, compared to gains of $287 million in the prior year quarter, primarily due to declines in the valuation of equity investments and losses on the sales of fixed income securities. Partially offsetting the net losses were gains on derivatives used to shorten the bond portfolio duration, which began in 2021 to reduce exposure to inflation and higher interest rates.
- **Unrealized net capital gains and losses** declined $1.5 billion in the second quarter of 2022, as higher interest rates and credit spreads resulted in lower fixed income valuations. Reducing the fixed income portfolio duration from 4.6 to 3.2 years since September 30, 2021, through the sale of bonds and use of derivatives, mitigated the valuation decline in the portfolio by approximately $1.3 billion year to date.
- **Total return** on the investment portfolio was a negative 2.8% for the second quarter of 2022.

Proactive Capital Management

"In the second quarter, Allstate continued to provide meaningful cash returns to shareholders. We returned $919 million to common shareholders through a combination of $683 million in share repurchases and $236 million in common shareholder dividends," said Mario Rizzo, Chief Financial Officer. "Shares outstanding have been reduced by 8.7% over the last twelve months and $1.8 billion remains on the current $5 billion share repurchase authorization, which is expected to be completed early next year," concluded Rizzo.

Visit www.allstateinvestors.com for additional information about Allstate's results, including a webcast of its quarterly conference call and the call presentation. The conference call will be at 9 a.m. ET on Thursday, August 4. Financial information, including material announcements about The Allstate Corporation, is routinely posted on www.allstateinvestors.com.

Forward-Looking Statements
This news release contains "forward-looking statements" that anticipate results based on our estimates, assumptions and plans that are subject to uncertainty. These statements are made subject to the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements do not relate strictly to historical or current facts and may be identified by their use of words like "plans," "seeks," "expects," "will," "should," "anticipates," "estimates," "intends," "believes," "likely," "targets" and other words with similar meanings. We believe these statements are based on reasonable estimates, assumptions and plans. However, if the estimates, assumptions or plans underlying the forward-looking statements prove inaccurate or if other risks or uncertainties arise, actual results could differ materially from those communicated in these forward-looking statements. Factors that could cause actual results to differ materially from those expressed in, or implied by, the forward-looking statements may be found in our filings with the U.S. Securities and Exchange Commission, including the "Risk Factors" section in our most recent annual report on Form 10-K. Forward-looking statements are as of the date on which they are made, and we assume no obligation to update or revise any forward-looking statement.

Definitions of Non-GAAP Measures

We believe that investors' understanding of Allstate's performance is enhanced by our disclosure of the following non-GAAP measures. Our methods for calculating these measures may differ from those used by other companies and therefore comparability may be limited.

Adjusted net income is net income (loss) applicable to common shareholders, excluding:

- Net gains and losses on investments and derivatives
- Pension and other postretirement remeasurement gains and losses
- Business combination expenses and the amortization or impairment of purchased intangibles
- Income or loss from discontinued operations
- Gain or loss on disposition of operations
- Adjustments for other significant non-recurring, infrequent or unusual items, when (a) the nature of the charge or gain is such that it is reasonably unlikely to recur within two years, or (b) there has been no similar charge or gain within the prior two years
- Related income tax expense or benefit of these items

Net income (loss) applicable to common shareholders is the GAAP measure that is most directly comparable to adjusted net income.

We use adjusted net income as an important measure to evaluate our results of operations. We believe that the measure provides investors with a valuable measure of the Company's ongoing performance because it reveals trends in our insurance and financial services business that may be obscured by the net effect of net gains and losses on investments and derivatives, pension and other postretirement remeasurement gains and losses, business combination expenses and the amortization or impairment of purchased intangibles, income or loss from discontinued operations, gain or loss on disposition of operations and adjustments for other significant non-recurring, infrequent or unusual items and the related tax expense or benefit of these items. Net gains and losses on investments and derivatives, and pension and other postretirement remeasurement gains and losses may vary significantly between periods and are generally driven by business decisions and external economic developments such as capital market conditions, the timing of which is unrelated to the insurance underwriting process. Business combination expenses, income or loss from discontinued operations and gain or loss on disposition of operations are excluded because they are non-recurring in nature and the amortization or impairment of purchased intangibles is excluded because it relates to the acquisition purchase price and is not indicative of our underlying business results or trends. Non-recurring items are excluded because, by their nature, they are not indicative of our business or economic trends. Accordingly, adjusted net income excludes the effect of items that tend to be highly variable from period to period and highlights the results from ongoing operations and the underlying profitability of our business. A byproduct of excluding these items to determine adjusted net income is the transparency and understanding of their significance to net income variability and profitability while recognizing these or similar items may recur in subsequent periods. Adjusted net income is used by management along with the other components of net income (loss) applicable to common shareholders to assess our performance. We use adjusted measures of adjusted net income in incentive compensation. Therefore, we believe it is useful for investors to evaluate net income (loss) applicable to common shareholders, adjusted net income and their components separately and in the aggregate when reviewing and evaluating our performance. We note that investors, financial analysts, financial and business media organizations and rating agencies utilize adjusted net income results in their evaluation of our and our industry's financial performance and in their investment decisions, recommendations and communications as it represents a reliable, representative and consistent measurement of the industry and the Company and management's performance. We note that the price to earnings multiple commonly used by insurance investors as a forward-looking valuation technique uses adjusted net income as the denominator. Adjusted net income should not be considered a substitute for net income (loss) applicable to common shareholders and does not reflect the overall profitability of our business.

The following tables reconcile net income (loss) applicable to common shareholders and adjusted net income. Taxes on adjustments to reconcile net income (loss) applicable to common shareholders and adjusted net income generally use a 21% effective tax rate.

($ in millions, except per share data)	**Three months ended June 30,**			
	Consolidated		**Per diluted common share**	
	2022	**2021**	**2022**	**2021**

Adjusted net income (loss) *	$ 517	$ 3,020	$ 1.85	$ 9.90

[1] Due to a net loss reported for the three months ended June 30, 2022, calculation uses weighted average shares of 273.8 million, which excludes weighted average diluted shares of 3.2 million.

[2] Due to a net loss reported for the six months ended June 30, 2022, calculation uses weighted average shares of 275.9 million, which excludes weighted average diluted shares of 3.5 million.

Adjusted net income return on Allstate common shareholders' equity is a ratio that uses a non-GAAP measure. It is calculated by dividing the rolling 12-month adjusted net income by the average of Allstate common shareholders' equity at the beginning and at the end of the 12-months, after excluding the effect of unrealized net capital gains and losses. Return on Allstate common shareholders' equity is the most directly comparable GAAP measure. We use adjusted net income as the numerator for the same reasons we use adjusted net income, as discussed previously. We use average Allstate common shareholders' equity excluding the effect of unrealized net capital gains and losses for the denominator as a representation of common shareholders' equity primarily applicable to Allstate's earned and realized business operations because it eliminates the effect of items that are unrealized and vary significantly between periods due to external economic developments such as capital market conditions like changes in equity prices and interest rates, the amount and timing of which are unrelated to the insurance underwriting process. We use it to supplement our evaluation of net income (loss) applicable to common shareholders and return on Allstate common shareholders' equity because it excludes the effect of items that tend to be highly variable from period to period. We believe that this measure is useful to investors and that it provides a valuable tool for investors when considered along with return on Allstate common shareholders' equity because it eliminates the after-tax effects of realized and unrealized net capital gains and losses that can fluctuate significantly from period to period and that are driven by economic developments, the magnitude and timing of which are generally not influenced by management. In addition, it eliminates non-recurring items that are not indicative of our ongoing business or economic trends. A byproduct of excluding the items noted above to determine adjusted net income return on Allstate common shareholders' equity from return on Allstate common shareholders' equity is the transparency and understanding of their significance to return on common shareholders' equity variability and profitability while recognizing these or similar items may recur in subsequent periods. We use adjusted measures of adjusted net income return on Allstate common shareholders' equity in incentive compensation. Therefore, we believe it is useful for investors to have adjusted net income return on Allstate common shareholders' equity and return on Allstate common shareholders' equity when evaluating our performance. We note that investors, financial analysts, financial and business media organizations and rating agencies utilize adjusted net income return on common shareholders' equity results in their evaluation of our and our industry's financial performance and in their investment decisions, recommendations and communications as it represents a reliable, representative and consistent measurement of the industry and the company and management's utilization of capital. We also provide it to facilitate a comparison to our long-term adjusted net income return on Allstate common shareholders' equity goal. Adjusted net income return on Allstate common shareholders' equity should not be considered a substitute for return on Allstate common shareholders' equity and does not reflect the overall profitability of our business.

The following tables reconcile return on Allstate common shareholders' equity and adjusted net income return on Allstate common shareholders' equity.

($ in millions)	**For the twelve months ended June 30,**	
	2022	**2021**
Return on Allstate common shareholders' equity		
Numerator:		
Net income applicable to common shareholders	$ 886	$ 3,911
Denominator:		
Beginning Allstate common shareholders' equity	$ 26,037	$ 25,016
Ending Allstate common shareholders' equity [(1)]	18,145	26,037
Average Allstate common shareholders' equity	$ 22,091	$ 25,527
Return on Allstate common shareholders' equity	4.0 %	15.3 %

($ in millions)	**For the twelve months ended June 30,**	
	2022	**2021**
Adjusted net income return on Allstate common shareholders' equity		
Numerator:		
Adjusted net income *	$ 1,530	$ 5,512
Denominator:		
Beginning Allstate common shareholders' equity	$ 26,037	$ 25,016
Less: Unrealized net capital gains and losses	2,164	2,602
Adjusted beginning Allstate common shareholders' equity	23,873	22,414
Ending Allstate common shareholders' equity [(1)]	18,145	26,037
Less: Unrealized net capital gains and losses	(2,138)	2,164
Adjusted ending Allstate common shareholders' equity	20,283	23,873
Average adjusted Allstate common shareholders' equity	$ 22,078	$ 23,144
Adjusted net income return on Allstate common shareholders' equity *	6.9 %	23.8 %

[(1)] Excludes equity related to preferred stock of $1,970 million as of June 30, 2022 and $2,170 million as of June 30, 2021.

Combined ratio excluding the effect of catastrophes, prior year reserve reestimates and amortization or impairment of purchased intangibles ("underlying combined ratio") is a non-GAAP ratio, which is computed as the difference between four GAAP operating ratios: the combined ratio, the effect of catastrophes on the combined ratio, the effect of prior year non-catastrophe reserve reestimates on the combined ratio, and the effect of amortization or impairment of purchased intangibles on the combined ratio. We believe that this ratio is useful to investors and it is used by management to reveal the trends in our Property-Liability business that may be obscured by catastrophe losses, prior year reserve reestimates and amortization or impairment of purchased intangibles. Catastrophe losses cause our loss trends to vary significantly between periods as a result of their incidence of occurrence and magnitude, and can have a significant impact on the combined ratio. Prior year reserve reestimates are caused by unexpected loss development on historical reserves, which could increase or decrease current year net income. Amortization or impairment of purchased intangibles relates to the acquisition purchase price and is not indicative of our underlying insurance business results or trends. We believe it is useful for investors to evaluate these components separately and in the aggregate when reviewing our underwriting performance. The most directly comparable GAAP measure is the combined ratio. The underlying combined ratio should not be considered a substitute for the combined ratio and does not reflect the overall underwriting profitability of our business.

The following tables reconcile the respective combined ratio to the underlying combined ratio. Underwriting margin is calculated as 100% minus the combined ratio.

Property-Liability	**Three months ended June 30,**		**Six months ended June 30,**	
	2022	**2021**	**2022**	**2021**
Combined ratio	107.9	95.7	102.7	89.5
Effect of catastrophe losses	(10.2)	(9.5)	(7.3)	(7.7)
Effect of prior year non-catastrophe reserve reestimates	(3.8)	0.2	(2.7)	0.1

The Allstate Corporation

Investor Supplement
Second Quarter 2022

The condensed consolidated financial statements and financial exhibits included herein are unaudited and should be read in conjunction with the consolidated financial statements and notes thereto included in the most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q. The results of operations for interim periods should not be considered indicative of results to be expected for the full year.

Measures used in these financial statements and exhibits that are not based on generally accepted accounting principles ("non-GAAP") are denoted with an asterisk (*). These measures are defined on the pages "Definitions of Non-GAAP Measures" and are reconciled to the most directly comparable generally accepted accounting principles ("GAAP") measure herein.

(1) Policy counts are based on items rather than customers.
- A multi-car customer would generate multiple item (policy) counts, even if all cars were insured under one policy.
- PIF does not reflect banking relationships for our lender-placed insurance products to customers including fire, home and flood products, as well as collateral protection insurance and guaranteed asset protection products for automobiles.
- Commercial lines PIF for shared economy agreements reflect contracts that cover multiple drivers as opposed to individual drivers.
- Allstate Roadside reflects memberships in force and do not include their wholesale partners as the customer relationship is managed by the wholesale partner.
- Allstate Dealer Services reflects service contracts and other products sold in conjunction with auto lending and vehicle sales transactions and do not include their third party administrators ("TPAs") as the customer relationship is managed by the TPAs.
- Allstate Protection Plans represents active consumer product protection plans.
- Allstate Identity Protection reflects individual customer counts for identity protection products.
- Allstate Health and Benefits reflects certificate counts as opposed to group counts.

(1) Refers to the number of U.S. states, the District of Columbia or Canadian provinces where rate changes have been implemented. Allstate brand operates in 50 states, the District of Columbia, and 5 Canadian provinces. National General operates in 50 states and the District of Columbia.
(2) Represents the impact in the locations where rate changes were implemented during the period as a percentage of total brand prior year-end premiums written.
(3) Total Allstate brand implemented auto insurance rate increases totaled $601 million in the second quarter of 2022, after implementing $862 million of rate increases in the first quarter of 2022.
(4) Represents the impact in the locations where rate changes were implemented during the period as a percentage of its respective total prior year-end premiums written in those same locations.

(2) 2021 calculations are based on consolidated results including held for sale investments.

Definitions of Non-GAAP Measures

We believe that investors' understanding of Allstate's performance is enhanced by our disclosure of the following non-GAAP measures. Our methods for calculating these measures may differ from those used by other companies and therefore comparability may be limited.

Adjusted net income is net income (loss) applicable to common shareholders, excluding:
- Net gains and losses on investments and derivatives
- Pension and other postretirement remeasurement gains and losses
- Business combination expenses and the amortization or impairment of purchased intangibles
- Income or loss from discontinued operations
- Gain or loss on disposition of operations
- Adjustments for other significant non-recurring, infrequent or unusual items, when (a) the nature of the charge or gain is such that it is reasonably unlikely to recur within two years, or (b) there has been no similar charge or gain within the prior two years
- Related income tax expense or benefit of these items

Net income (loss) applicable to common shareholders is the GAAP measure that is most directly comparable to adjusted net income. We use adjusted net income as an important measure to evaluate our results of operations. We believe that the measure provides investors with a valuable measure of the Company's ongoing performance because it reveals trends in our insurance and financial services business that may be obscured by the net effect of net gains and losses on investments and derivatives, pension and other postretirement remeasurement gains and losses, business combination expenses and the amortization or impairment of purchased intangibles, income or loss from discontinued operations, gain or loss on disposition of operations and adjustments for other significant non-recurring, infrequent or unusual items and the related tax expense or benefit of these items. Net gains and losses on investments and derivatives, and pension and other postretirement remeasurement gains and losses may vary significantly between periods and are generally driven by business decisions and external economic developments such as capital market conditions, the timing of which is unrelated to the insurance underwriting process. Business combination expenses, income or loss from discontinued operations and gain or loss on disposition of operations are excluded because they are non-recurring in nature and the amortization or impairment of purchased intangibles is excluded because it relates to the acquisition purchase price and is not indicative of our underlying business results or trends. Non-recurring items are excluded because, by their nature, they are not indicative of our business or economic trends. Accordingly, adjusted net income excludes the effect of items that tend to be highly variable from period to period and highlights the results from ongoing operations and the underlying profitability of our business. A byproduct of excluding these items to determine adjusted net income is the transparency and understanding of their significance to net income variability and profitability while recognizing these or similar items may recur in subsequent periods. Adjusted net income is used by management along with the other components of net income (loss) applicable to common shareholders to assess our performance. We use adjusted measures of adjusted net income in incentive compensation. Therefore, we believe it is useful for investors to evaluate net income (loss) applicable to common shareholders, adjusted net income and their components separately and in the aggregate when reviewing and evaluating our performance. We note that investors, financial analysts, financial and business media organizations and rating agencies utilize adjusted net income results in their evaluation of our and our industry's financial performance and in their investment decisions, recommendations and communications as it represents a reliable, representative and consistent measurement of the industry and the Company and management's performance. We note that the price to earnings multiple commonly used by insurance investors as a forward-looking valuation technique uses adjusted net income as the denominator. Adjusted net income should not be considered a substitute for net income (loss) applicable to common shareholders and does not reflect the overall profitability of our business. A reconciliation of adjusted net income to net income (loss) applicable to common shareholders is provided in the schedule, "Contribution to Income".

Underlying loss ratio is a non-GAAP ratio, which is computed as the difference between three GAAP operating ratios: the loss ratio, the effect of catastrophes on the combined ratio, and the effect of prior year non-catastrophe reserve reestimates on the combined ratio. We believe that this ratio is useful to investors and it is used by management to reveal the trends that may be obscured by catastrophe losses and prior year reserve reestimates. Catastrophe losses cause our loss trends to vary significantly between periods as a result of their incidence of occurrence and magnitude, and can have a significant impact on the combined ratio. Prior year reserve reestimates are caused by unexpected loss development on historical reserves. We believe it is useful for investors to evaluate these components separately and in the aggregate when reviewing our underwriting performance. The most directly comparable GAAP measure is the loss ratio. The underlying loss ratio should not be considered a substitute for the loss ratio and does not reflect the overall loss ratio of our business. A reconciliation of underlying loss ratio is provided in the schedules "Property-Liability Results", "Allstate Protection Profitability Measures", "Auto Profitability Measures" and "Homeowners Profitability Measures".

Underlying expense ratio is a non-GAAP ratio, which is computed as the difference between the expense ratio and the effect of amortization or impairment of purchased intangibles on the expense ratio. We believe that the measure provides investors with a valuable measure of ongoing performance because it reveals trends that may be obscured by the amortization or impairment of purchased intangible assets. Amortization or Impairment of purchased intangible assets is excluded because it relates to the acquisition purchase price and is not indicative of our business results or trends. We believe it is useful for investors to evaluate these components separately and in the aggregate when reviewing our underwriting performance. The most directly comparable GAAP measure is the expense ratio. The underlying expense ratio should not be considered a substitute for the expense ratio and does not reflect the overall expense ratio of our business. A reconciliation of underlying expense ratio is provided in the schedules "Property-Liability Results", "Allstate Protection Profitability Measures", "Auto Profitability Measures" and "Homeowners Profitability Measures".

Adjusted underwriting expense ratio is a non-GAAP ratio, which is computed as the difference between the expense ratio and the effect of advertising expense, restructuring and related charges, amortization or impairment of purchased intangibles and Coronavirus related expenses on the expense ratio. We believe that the measure provides investors with a valuable measure of ongoing performance because it reveals trends that may be obscured by the advertising expense, restructuring and related charges, amortization or impairment of purchased intangibles and Coronavirus related expenses. Advertising expense is excluded as it may vary significantly from period to period based on business decisions and competitive position. Restructuring and related charges are excluded because these items are not indicative of our business results or trends. Coronavirus related expenses are excluded because these items are related to programs offered during the peak of the pandemic that are no longer available. Amortization or impairment of purchased intangible assets is excluded because it relates to the acquisition purchase price. These are not indicative of our business results or trends. A reduction in expenses enables investment flexibility that can drive growth. We believe it is useful for investors to evaluate these components separately and in the aggregate when reviewing our underwriting performance. The most directly comparable GAAP measure is the expense ratio. The adjusted underwriting expense ratio should not be considered a substitute for the expense ratio and does not reflect the overall expense ratio of our business.

Adjusted expense ratio is a non-GAAP ratio, which is computed as the combination of the adjusted underwriting expense ratio and claims expense ratio excluding catastrophe expense. We believe it is useful for investors to evaluate this ratio which is linked to a long-term expense ratio improvement commitment through 2024. The most directly comparable GAAP measure is the expense ratio. The adjusted expense ratio should not be considered a substitute for the expense ratio and does not reflect the overall expense ratio of our business.

Underlying combined ratio is a non-GAAP ratio, which is the sum of the underlying loss and underlying expense ratios. We believe that this ratio is useful to investors and it is used by management to reveal the trends in our Property-Liability business that may be obscured by catastrophe losses, prior year reserve reestimates and amortization or impairment of purchased intangibles. We believe it is useful for investors to evaluate these components separately and in the aggregate when reviewing our underwriting performance. The most directly comparable GAAP measure is the combined ratio. The underlying combined ratio should not be considered a substitute for the combined ratio and does not reflect the overall underwriting profitability of our business. A reconciliation of the underlying combined ratio to combined ratio is provided in the schedule "Property-Liability Results", "Auto Profitability Measures" and "Homeowners Profitability Measures".

Definitions of Non-GAAP Measures (continued)

Protection Services adjusted earnings before taxes, depreciation and restructuring, is a non-GAAP measure, which is computed as adjusted net income (loss), excluding taxes, depreciation and restructuring. Adjusted net income (loss) is the GAAP measure that is most directly comparable to adjusted earnings before taxes, depreciation and restructuring. We use adjusted earnings before taxes, depreciation and restructuring, as an important measure to evaluate Protection Services' results of operations. We believe that the measure provides investors with a valuable measure of Protection Services' ongoing performance because it reveals trends that may be obscured by the taxes, depreciation and restructuring expenses. Taxes, depreciation and restructuring are excluded because these are not directly attributable to the underlying operating performance of Protection Services' segment. Adjusted earnings before taxes, depreciation and restructuring highlights the results from ongoing operations and the underlying profitability of our business and is used by management along with the other components of adjusted net income (loss) to assess our performance. We believe it is useful for investors to evaluate adjusted net income (loss), adjusted earnings before taxes, depreciation and restructuring, and their components separately and in the aggregate when reviewing and evaluating Protection Services segment's performance. Adjusted earnings before taxes, depreciation and restructuring should not be considered a substitute for adjusted net income (loss) and does not reflect the overall profitability of our business. A reconciliation of adjusted net income (loss) to adjusted earnings before taxes, depreciation and restructuring, is provided in the schedule, "Protection Services Segment Results".

Adjusted net income return on Allstate common shareholders' equity is a ratio that uses a non-GAAP measure. It is calculated by dividing the rolling 12-month adjusted net income by the average of Allstate common shareholders' equity at the beginning and at the end of the 12-months, after excluding the effect of unrealized net capital gains and losses. Return on Allstate common shareholders' equity is the most directly comparable GAAP measure. We use adjusted net income as the numerator for the same reasons we use adjusted net income, as discussed previously. We use average Allstate common shareholders' equity excluding the effect of unrealized net capital gains and losses for the denominator as a representation of common shareholders' equity primarily applicable to Allstate's earned and realized business operations because it eliminates the effect of items that are unrealized and vary significantly between periods due to external economic developments such as capital market conditions like changes in equity prices and interest rates, the amount and timing of which are unrelated to the insurance underwriting process. We use it to supplement our evaluation of net income (loss) applicable to common shareholders and return on Allstate common shareholders' equity because it excludes the effect of items that tend to be highly variable from period to period. We believe that this measure is useful to investors and that it provides a valuable tool for investors when considered along with return on Allstate common shareholders' equity because it eliminates the after-tax effects of realized and unrealized net capital gains and losses that can fluctuate significantly from period to period and that are driven by economic developments, the magnitude and timing of which are generally not influenced by management. In addition, it eliminates non-recurring items that are not indicative of our ongoing business or economic trends. A byproduct of excluding the items noted above to determine adjusted net income return on Allstate common shareholders' equity from return on Allstate common shareholders' equity is the transparency and understanding of their significance to return on common shareholders' equity variability and profitability while recognizing these or similar items may recur in subsequent periods. We use adjusted measures of adjusted net income return on Allstate common shareholders' equity in incentive compensation. Therefore, we believe it is useful for investors to have adjusted net income return on Allstate common shareholders' equity and return on Allstate common shareholders' equity when evaluating our performance. We note that investors, financial analysts, financial and business media organizations and rating agencies utilize adjusted net income return on common shareholders' equity results in their evaluation of our and our industry's financial performance and in their investment decisions, recommendations and communications as it represents a reliable, representative and consistent measurement of the industry and the company and management's utilization of capital. Adjusted net income return on Allstate common shareholders' equity should not be considered a substitute for return on Allstate common shareholders' equity and does not reflect the overall profitability of our business. A reconciliation of return on Allstate common shareholders' equity and adjusted net income return on Allstate common shareholders' equity can be found in the schedule, "Return on Allstate Common Shareholders' Equity".

Book value per common share, excluding the impact of unrealized net capital gains and losses on fixed income securities, is a ratio that uses a non-GAAP measure. It is calculated by dividing Allstate common shareholders' equity after excluding the impact of unrealized net capital gains and losses on fixed income securities and related DAC by total common shares outstanding plus dilutive potential common shares outstanding. We use the trend in book value per common share, excluding the impact of unrealized net capital gains and losses on fixed income securities, in conjunction with book value per common share to identify and analyze the change in net worth applicable to management efforts between periods. We believe the non-GAAP ratio is useful to investors because it eliminates the effect of items that can fluctuate significantly from period to period and are generally driven by economic developments, primarily capital market conditions, the magnitude and timing of which are generally not influenced by management, and we believe it enhances understanding and comparability of performance by highlighting underlying business activity and profitability drivers. We note that book value per common share, excluding the impact of unrealized net capital gains and losses on fixed income securities, is a measure commonly used by insurance investors as a valuation technique. Book value per common share is the most directly comparable GAAP measure. Book value per common share, excluding the impact of unrealized net capital gains and losses on fixed income securities, should not be considered a substitute for book value per common share, and does not reflect the recorded net worth of our business. A reconciliation of book value per common share, excluding the impact of unrealized net capital gains on fixed income securities, and book value per common share can be found in the schedule, "Book Value per Common Share and Debt to Capital".

Glossary

Consolidated Operations

Accident and health insurance premiums and contract charges are reported in the Allstate Health and Benefits segment and include employer voluntary benefits, group health and individual health products.

Adjusted net income is the GAAP segment measure used for the Protection Services, Allstate Health and Benefits, and Corporate and Other segments.

Average Allstate common shareholders' equity and average adjusted Allstate common shareholders' equity are determined using a two-point average, with the beginning and ending Allstate common shareholders' equity and Allstate adjusted common shareholders' equity, respectively, for the twelve-month period as data points.

Other revenue primarily represents fees collected from policyholders relating to premium installment payments, commissions on sales of non-proprietary products, sales of identity protection services, fee-based services and other revenue transactions.

Property and casualty insurance premiums are reported in the Allstate Protection and Protection Services segments and include auto, homeowners, other personal lines and commercial lines insurance products, as well as consumer product protection plans, roadside assistance and finance and insurance products.

Property-Liability

Average premium - gross written: Gross premiums written divided by issued item count. Gross premiums written include the impacts from discounts, surcharges and ceded reinsurance premiums and exclude the impacts from mid-term premium adjustments and premium refund accruals. Average premiums represent the appropriate policy term for each line, which is generally 6 months for auto and 12 months for homeowners.

Claims expense ratio excluding catastrophe expense: Incurred loss adjustment expenses, net of reinsurance, excluding expenses related to catastrophes. These expenses are embedded within the loss ratio.

Coronavirus related expenses includes shelter-in-place payback and special payment plan bad debt expenses.

Expense ratio: Other revenue is deducted from other costs and expenses in the expense ratio calculation.

Gross claim frequency is calculated as annualized notice counts, excluding counts associated with catastrophe events, received in the period divided by the average of policies in force with the applicable coverage during the period. It includes all actual notice counts, regardless of their current status (open or closed) or their ultimate disposition (closed with a payment or closed without payment). The percent change in gross claim frequency is calculated as the amount of increase or decrease in the gross claim frequency in the current period compared to the same period in the prior year, divided by the prior year gross claim frequency.

New issued applications: Item counts of automobiles or homeowners insurance applications for insurance policies that were issued during the period, regardless of whether the customer was previously insured by another Allstate Protection brand. Allstate brand includes automobiles added by existing customers when they exceed the number allowed (currently 10) on a policy.

Other business lines primarily represent commissions earned and other costs and expenses for Ivantage and non-proprietary life and annuity products.

Paid claim severity is calculated by dividing the sum of paid losses and loss expenses by claims closed with a payment during the period. The percent change in paid claim severity is calculated as the amount of increase or decrease in paid claim severity in the current period compared to the same period in the prior year, divided by the prior year paid claim severity.

Renewal ratio: Renewal policy item counts issued during the period, based on contract effective dates, divided by the total policy item counts issued generally 6 months prior for auto or 12 months prior for homeowners.

Protection Services

Other costs and expenses may include amortization of deferred policy acquisition costs, operating costs and expenses, and restructuring and related charges.

Revenue may include net premiums earned, intersegment insurance premiums and service fees, other revenue, revenue earned from external customers and net investment income.

Allstate Health and Benefits

Benefit ratio is accident, health and other policy benefits less interest credited to contractholder funds, divided by premiums and contract charges.

Employer voluntary benefits includes supplemental life and health products offered through workplace enrollment.

Group health includes health products and administrative services sold to employers.

Individual health includes short-term medical and other health products sold directly to individuals.

Investments

Duration measures the price sensitivity of assets and liabilities to changes in interest rates.

Equity securities include investments in exchange traded and mutual funds whose underlying investments are fixed income securities.

Interest-bearing investments comprise fixed income securities, mortgage loans, short-term investments, and other investments including bank loans and derivatives.

Internal rate of return is one of the measures we use to evaluate the performance of these investments. The IRR represents the rate of return on the investments considering the cash flows paid and received and, until the investment is fully liquidated, the estimated value of investment holdings at the end of the measurement period. The calculated IRR for any measurement period is highly influenced by the values of the portfolio at the beginning and end of the period, which reflect the estimated fair values of the investments as of such dates. As a result, the IRR can vary significantly for different measurement periods based on macroeconomic or other events that impact the estimated beginning or ending portfolio value, such as the global financial crisis. Our IRR calculation method may differ from those used by other investors. The timing of the recognition of income in the financial statements may differ significantly from the cash distributions and changes in the value of these investments.

Limited partnership interests: Income from equity method of accounting LP is generally recognized on a three-month delay due to the availability of the investee financial statements.

LP and other investments comprise limited partnership interests and other alternative investments, including real estate investments classified as other investments. Market-based investments include publicly traded equity securities classified as limited partnerships.

Market-based strategy seeks to deliver predictable earnings aligned to business needs and take advantage of short-term opportunities primarily through public and private fixed income investments and public equity securities.

Performance-based strategy seeks to deliver attractive risk-adjusted returns and supplement market risk with idiosyncratic risk primarily through investments in private equity, including infrastructure investments, and real estate, most of which were limited partnerships.

Pre-tax yields: Quarterly pre-tax yield is calculated as annualized quarterly investment income, before investment expense divided by the average of the ending investment balances of the current and prior quarter. Year-to-date pre-tax yield is calculated as annualized year-to-date investment income, before investment expense divided by the average of investment balances at the beginning of the year and the end of each quarter during the year. For the purposes of the pre-tax yield calculation, income for directly held real estate and other investments is net of investee level expenses (asset level operating expenses reported in investment expense). Fixed income securities investment balances exclude unrealized capital gains and losses. Equity securities investment balances use cost in the calculation.

Total return on investment portfolio is calculated from GAAP results, including the total of net investment income, net gains and losses on investments and derivative instruments, the change in unrealized net capital gains and losses, and the change in the difference between fair value and carrying value of mortgage and bank loans divided by the average fair value balances.
